

BULLETIN NO. 13/14-013

DATE: 27 Dec 13

TO: ALL ISR Affiliates

SUBJECT: PREHEAT "HOLESHOT" SWITCH REPLACEMENT

ISR has approved the replacement of the left hand control module.

WARNING: This information relates to the preparation and use of snowmobiles in competitive events. BRP disclaims liability for all damages and/or injuries resulting from the improper use of the contents. We strongly recommend that these modifications be carried out and/or verified by a highly skilled professional racing technician. It is understood that racing or modifications of any BRP produced snowmobile voids the vehicle warranty and that such modifications may render use of the vehicle illegal in other than sanctioned racing events under existing federal, provincial and state regulations.

PREHEAT "HOLESHOT" SWITCH REPLACEMENT

ISR has approved the replacement of the left hand control module, to include the "Holeshot" button switch and the headlight dimmer switch. The correct replacement switch is the Sea Doo Start/Stop switch, Part # 278 001 733. **DO NOT USE THE PREVIOUS YEARS PREHEAT SWITCH.** The previous years switch, had a component molded inside, which directed the ECM to switch between the Preheat and Race timing curve. For 2014 the component is located in the wiring harness. Therefore, a NORMALLY OPEN, push button ON/OFF switch will work.
