

**BULLETIN NO. 14/15-022**

**DATE: 25 Aug 15**

**TO: ALL ISR DRAG Racing Affiliates**

All disciplines (Grass and Dirt-Ice-Snow-Asphalt)

**SUBJECT: Fuel Clarification**

Only a commercially available pump gasoline that complies with these rules is allowed. (The term "pump gasoline" includes fuels dispensed from service station pumps and racing fuels that are commercially available in fuel cans and drums.) The gasoline may be mixed with petroleum, vegetable, or synthetic based lubricants. The use of oils, fuels (including gasohol), and additives that provide power-boosting characteristics are strictly forbidden. Fuel with ethanol may be used up to 10% (ten percent) in all Drag Race classes.

In these specific classes: Lake Racer, Pro Max, and Outlaw....  
VP Import and VP Q16 may be used as an alternate fuel.

All standard fuel tests still apply as they pertain to the type of fuel used.

In the case of "Import" & "Q16" ISR has on file the spectrograph footprint of this category of fuel and competitors using "Import" may be required to supply samples for comparison purposes. VP Import and VP Q16 fuel needs to be used as produced by VP fuels (no cutting or blending.)

ISR Rule clarification 8-25-15 #3182515
